

SADAAN ANSARI

Junior Software Developer

Mumbai, India | +91 7045623244 | ansarisadaan72@gmail.com | [GitHub](#) | [Portfoli](#) | [LinkedIn](#)

PROFILE

Results-driven Software Developer with **2.1** years of experience in full-stack development, specializing in **Node.js, Express.js, React.js, REST APIs**, and SQL/NoSQL databases (**MongoDB, MySQL, Redis, and ScyllaDB**). Skilled in building scalable backend services, optimizing application performance, and delivering secure, high-quality web applications using Agile development practices.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript (Basic) PHP, C/C++, SQL, CQL (ScyllaDB)

Tools: Docker, Git/GitHub, VS Code, Postman, Chrome DevTools, Swagger API Docs, Basic Jira Workflow Knowledge

Databases: MySQL, MongoDB, ScyllaDB, Redis

Frameworks & Libraries: Node.js, Express.js, React.js, Socket.IO, CodeIgniter (MVC), TailwindCSS, Material-UI, Bootstrap

Concepts & Methodologies: REST APIs, Microservices, Agile/Scrum, OOP, MVC Architecture, DBMS

EXPERIENCE

SlashRtc, | *Junior Software Developer*

10/2024 – Present | Mumbai, India

- Developed and maintained web applications using **JavaScript, React.js, Node.js, Express.js, PHP, and ScyllaDB**, delivering client-specific business solutions.
- Designed, enhanced, and maintained backend APIs, business logic, and database operations for enterprise applications, ensuring scalability and reliability.
- Customized and implemented new features for the Customer Delivery (CD) team based on client requirements while maintaining high code quality.
- Worked as part of the **L3 Development team**, performing root cause analysis, debugging complex production issues, and deploying long-term fixes.
- Optimized application performance by identifying bottlenecks, improving database queries, and enhancing overall system stability.
- Contributed to the development of an internal **Ticket Portal** for customer issue management, workflow automation, and sales tracking.
- Collaborated with cross-functional teams using **Git**, participated in code reviews, testing, and production deployments.

Coast to Coast Holidays, | *Junior Developer*

05/2024 – 09/2024 | Mumbai, India

- Updated website content, both with and without **CMS** platforms.
- Added and modified application logic using the **CodeIgniter framework**.
- Designed and implemented **PHP** and **MySQL** solutions based on project requirements.
- Collaborated with the team on database structuring and optimization

PROJECTS

Ticket Portal, | *Development* | **Node.js, Next.js, scyllaDB, tailwindCSS, Redux Toolkit**

07/2025

- Developed **email-based** ticket creation services with **attachment handling**, automated ticket generation, and secure document storage.
- Implement **Round Robin ticket assignment** mechanisms to automate and evenly distribute support requests among agents.
- Build real-time application features using **Socket.IO** , including **live notifications, ticket updates**, and **online/offline** user presence tracking.
- Design and implement **role-based** and **policy-based** access control systems to manage **feature-level** permissions across multiple application modules.
- Analyze and resolve production issues, perform application maintenance, and optimize system performance to ensure reliability and scalability of the platform.

DevConnect, [🔗](#)

06/2025 – 11/2025

| *Development* | **React.js (Vite), Node.js, Express.js MongoDB, JWT, Socket.io , Redux Toolkit, ShadCN UI, Razorpay**

- Developed a full-stack social networking platform that enables developers to register, connect, send requests, and chat in real time.
- Designed and built scalable RESTful APIs using Node.js, Express.js, and MongoDB for user management, connections, messaging, and premium features.
- Implemented JWT-based authentication and authorization with protected routes and secure session handling.
- Integrated **Socket.IO** for real-time one-to-one messaging and live updates.
- Designed MongoDB schemas and optimized database queries for efficient data retrieval and performance.
- Integrated Razorpay payment gateway for premium membership subscriptions and secure payment processing.
- Implemented Redux Toolkit for efficient state management and built a responsive UI using React, Tailwind CSS, and ShadCN UI.
- Used Git for version control and followed modular, reusable code practices for maintainability.

EDUCATION

BE in Computer Engineering, *G.V Acharya Institute of Engineering and technology*
CGPA: 8.58/10

07/2023 | Mumbai, India
